

Are you ready for Affordable Care Act IRS reporting?

The clock is ticking and 2016 will be here before you know it.

The ACA Dashboard

Affordable Care Act (ACA) reporting for the IRS is complicated. To avoid costly compliance fines, every employer with 50 or more full-time employees and equivalents must report in 2016 its employee health benefits information and activities from 2015. We can help! Pinnacle Claims Management, Inc. has leveraged its technology and expertise to offer IRS reporting through the ACA Dashboard. Equipped with all the reporting essentials, Pinnacle's ACA Dashboard offers a cloud-based solution designed to aggregate employer plan and coverage information to ease the administrative burden and autofill the required IRS 1094-C and 1095-C forms for you.

Here's how it helps:

- Consolidates information related to offers of coverage, employee elections and eligibility data
- Allows you to upload eligibility records directly to the reporting tool
- Tracks all health plans offered to your employees
- Generates associated reporting codes based upon your health plan information
- Autofills the IRS 1094-C and 1095-C forms
- Mailing service available to distribute employee statements (IRS 1095-C form)
- E-filing service coming soon!

In-house solutions and typical payroll or benefit administration reporting cannot fully address the evolving complexity of the ACA. We utilize employer-specific data to help you streamline IRS reporting and generate the forms you need to file with the IRS and provide to your employees.

Ready to get started? Don't wait another day to prepare for ACA reporting requirements for tax season 2016! Contact us at (866) 930-7264 or dashboard@pinnacletpa.com to learn more about the program or get a quote today.
